#### Barbara S. Minsker

Professor

Dept. of Civil & Environmental Engineering 3230D Newmark Laboratory, MC-250 University of Illinois Urbana, IL 61801

217-974-0263 (personal) E-mail: <u>barbara.minsker@gmail.com</u>

Office phone: 217-265-5293

Cell phone: 217-417-4198 (university);

http://emsa.ncsa.uiuc.edu/

#### **EDUCATION**

B.S. with Distinction, Cornell University, Operations Research and Industrial Engineering, 1986 Ph.D., Cornell University, Civil and Environmental Engineering, 1995

Post-doctoral research associate, University of Vermont, Research Center for Groundwater Remediation Design, 1995 – 1996

Future Thinking leadership development program, <u>Center for Authentic Leadership</u>, 2007-2010 <u>Committee on Institutional Cooperation (CIC) Academic Leadership Program</u>, 2009-10

#### HONORS AND AWARDS

1998	National Science Foundation Faculty Early Career Development (CAREER) Award
1999-2000	National Center for Supercomputing Applications (NCSA) Faculty Fellow
2000	Army Young Investigator Award
2000	Presidential Early Career Award for Scientists & Engineers (PECASE)
2001-2002	Center for Advanced Study Fellow
2001-2010	Arthur and Virginia Nauman Faculty Scholar
2003	Fellow, Japan Society for the Promotion of Science Invitation Fellowship Program
2003	American Society of Civil Engineers Walter L. Huber Civil Engineering Research Prize
2005	ASCE Environmental and Water Resources Institute Outstanding Achievement Award
2006	Xerox Award for Faculty Research
2008-2011	University Scholar

# **RESEARCH INTERESTS**

Coupling machine learning with heterogeneous sensor data and advanced information technology to: (1) improve understanding of coupled human and natural systems, and (2) identify innovative and cost-effective management solutions for addressing complex challenges such as sustainability, hypoxia, combined sewer overflows, watershed best management practices, and flooding.

#### PROFESSIONAL EXPERIENCE

2006-present	Professor, Department of Civil and Environmental Engineering, University of Illinois
	Urbana-Champaign
1999-present	Faculty Affiliate, National Center for Supercomputing Applications, University of Illinois
	Urbana-Champaign
2010-present	President, Joyful U, Inc.
2008-2011	Associate Provost Fellow, Office of the Provost, University of Illinois Urbana-Champaign
2005-2007	President, Hazard Management Systems, Inc.
2002-2006	Associate Professor, Department of Civil and Environmental Engineering, University of
	Illinois Urbana-Champaign
1996-2002	Assistant Professor, Department of Civil and Environmental Engineering, University of
	Illinois Urbana-Champaign

1988-1990 Environmental Policy Analyst and Work Assignment Manager, Wade Miller Associates,

Arlington, VA

1986-1988 Environmental Policy Analyst, ICF Incorporated, Fairfax, VA

## MAJOR LEADERSHIP ACTIVITIES

- Department of Civil and Environmental Engineering (CEE):
  - Founding Co-Coordinator, Sustainable and Resilient Infrastructure Systems Program (2011-present): Creating governance structure to serve as a model for cross-disciplinary programs, new MS and PhD programs, and new courses integrating sustainability and resilience into CEE planning, design, and management.
  - <u>Chair, Global and Multidisciplinary Committee</u> (2010): Created multidisciplinary and global learning outcomes, new multidisciplinary and global faculty awards and fellows, a new program in Sustainable and Resilient Infrastructure Systems, a new primary specialty in Sustainable and Resilient Infrastructure Systems, and three new secondary specialties in Sustainability, CEE in a Global Context, and Custom Multidisciplinary.

## • Campus:

O Associate Provost Fellow (2008-11): Led the creation of the University of Illinois Urbana-Champaign Sustainability Initiative vision, implementation plan, and curriculum development program (<a href="http://sustainability.illinois.edu">http://sustainability.illinois.edu</a>), 2008-11. Currently leading the development of experiential learning sites to integrate research, education, and engagement in addressing real-world sustainability challenges using advanced technology, 2010-12.

#### • National:

- Principal Investigator (PI) and co-PI of the National Science Foundation (NSF)-funded WATERS
   <u>Network Project Office (http://watersnet.org)</u>, 2005-10. National science plan evaluated by the
   National Research Council contributed to creation of a new \$16 million/year NSF program on
   Water Sustainability and Climate.
- American Society of Civil Engineers:
  - <u>Founding Chair</u>, Task Committee on Performance-Based Sustainable Design of Water Resources Infrastructure (proposed, 2011)
  - <u>Secretary</u>, Environmental Sensing and Cyber-infrastructure: Technologies and Applications (2011-present). Also control group member, 2010-11.
  - <u>Chair</u>, Environmental and Water Resource Systems Committee (2005-6). Also secretary (2003-4), Vice-Chair (2004-5), Past-Chair (2006-7).
  - <u>Founding Chair</u>, Task Committee on Long-Term Groundwater Monitoring (2000-2003). Awarded EWRI Outstanding Achievement Award.
  - Control Group Member, Evolutionary Computation Task Committee (2003-6)
- o Associate Editor, Water Resources Research (2002-4)

## BOOKS AND BOOK CHAPTERS

"Genetic Algorithms," in *Hydroinformatics: Data Integrative Approaches in Computation, Analysis, and Modeling*, ed. Praveen Kumar, CRC Press, ISBN 0849328942, 2005.

The Joyful Professor: How to Shift From Surviving to Thriving in the Faculty Life, Henschel Haus Publishing Inc., 2010.

## **COURSES TAUGHT**

- **CEE 201: Planning, Design, and Management of Civil Engineering Systems.** Introduction to the formulation and solution of civil engineering systems problems. Major topics are engineering economics, mathematical modeling, and optimization. (Fall 1996, 1997, 1998, 2001, 2002, 2004, 2006, 2008; Spring 2012)
- **CEE 434: Environmental Systems Analysis I.** Examination of principles of environmental engineering design: applications to mathematical methods, including single and multi-objective programming, to environmental systems; economic analysis, including benefit-cost; and policy and management strategies. (Fall 1999)
- **CEE 498 BSM: Environmental Risk Assessment and Management.** Risk assessment methods are introduced and issues associated with managing risk are discussed. The course is taught in a case study format, focusing on a variety of environmental case studies such as air pollution, climate change, drinking water, hazardous waste storage, transport and disposal, and Superfund remediation. (Fall 2000, Spring 2003 online and in-person)
- CEE 535: Environmental Systems Analysis II, Risk and Uncertainty in Environmental and Water Resources Decision Making. Exploration of the fundamental concepts of uncertainty, risk, and reliability as applied to environmental and water resources systems. (Spring 1997, 1999, 2001, 2011)

CEE 598 OS: Optimization Methods for Engineering Design. Optimization models have been shown to be useful tools for aiding engineering design in many fields. This course focuses on methods for applying nonlinear optimization to engineering design, with a practical, applications-oriented perspective. The course is intended to serve students from all areas of engineering and does not assume prior knowledge in any particular application area. Students complete a project applying one of the methods to a problem in their own field. (Spring 2000, 2002)

**CEE 598 SUS: Sustainable Urban Systems.** This course explores fundamental concepts of sustainability and resilience as applied to urban infrastructure systems, including the complex interactions among human, engineered, and natural systems. The course is taught from a project-based format; focusing on a CEE-related infrastructure issue. The first offering focuses on proposed stormwater ordinances for Champaign and Urbana, examining alternative policy and design options to reduce stormwater problems while improving (or at least not worsening) other sustainability issues. (Fall 2011)

#### RESEARCH FUNDING

Years (Inclusive)	Brief Title or Description	Source of Funds	Total Funding	# of PI's & Lead PI if not Minsker
1997-1998	Computationally-Efficient Management Tools for Groundwater Remediation Design	University of Illinois Campus Research Board	\$13,973	1
1998-2004	Research and Educational Advances in Optimal Groundwater Remediation Design	National Science Foundation CAREER Program	\$246,868	1
